

High Volume Water Reels

Series GC7000

New Product Announcement

DESCRIPTION

Engineers at Reelcraft have successfully tailored our 7000 Series reels to better serve those applications that require a large volume of water. The 7000 series is valued for its strength and long service life. Completing the package, the GC 7000 Series offer a brass on/off valve, nickel plating on standard swivels, and a 10' inlet hose. Available with 35' of standard 5/8" garden hose or more substantial 25' of 3/4" pvc hose, these reels are a practical solution to your high volume water dispensing needs.

BENEFITS

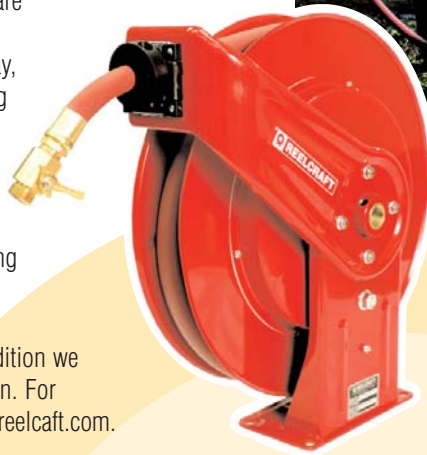

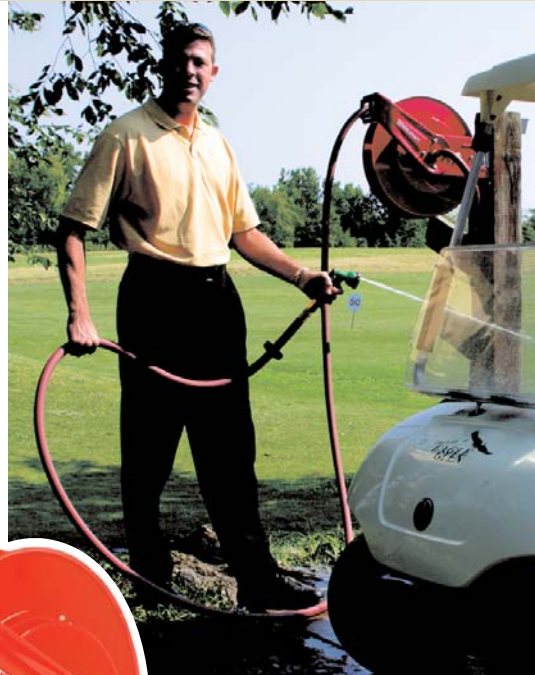

- **Corrosion Resistance** Each individual steel component has a baked-on powder coat finish. Swivel is nickel plated and ball valve is brass. The end result provides excellent resistance to weathering, abrasion, and corrosion.
- **Structural Strength** Base and guide arms are formed from high-grade steel and engineered with structural forms and gussets. The base is robotically welded and fasteners are vibration-proof and self-locking.
- **Safety** Keeps long lengths of hose up and out of way, reducing occurrences of slip, trips, or falls. Drive spring is banded for safety during maintenance.

APPLICATIONS

- Turf Care
- Lawn & Garden
- Resorts/Hotels
- Farm & Ranch
- Nursery
- Grounds Maintenance
- Heavy Equipment Cleaning
- Golf Course

RELATED PRODUCTS

Reelcraft offers a host of other golf course reels. In addition we offer other models in a hand crank or motorized version. For a complete product listing visit us on the web at www.reelcraft.com.
